

The Measure of Mining Expertise

The Canadian Mining Certification Program (CMCP)

Become an Examiner Panel member

CANADIAN MINING
CERTIFICATION PROGRAM

The **Canadian Mining Certification Program (CMCP)** is the industry-standard for validating the skills, knowledge, and experience of workers in the mining sector.

An Examiner Panel is comprised of subject matter experts in their occupation entrusted with upholding the industry standard.

Who can join?

To become an Examiner Panel member you must be proficient in at least one of the following occupations:

- Diamond Drillers
- Frontline Supervisors
- Hoist Operators
- Industry Trainers
- Mineral Processing Operators
- Surface Miners
- Underground Miners

You are committed to the industry by volunteering your time and collaborating with other examiner panel members to determine if candidates meet the requirements to certify.

Why Join?

Becoming an Examiner Panel member is a great opportunity to work with other subject matter experts in your occupation. As a member, you will:

- Validate candidates' competencies in line with National Occupational Standards
- Be recognized as an industry leader
- Contribute to the sustainability of the Canadian mining sector
- Be part of building a safer workforce

What is involved?

You will work remotely with other Examiner Panel members to evaluate candidates' application packages and make unanimous decisions on whether they meet the requirements to certify. While this involves a time commitment, every effort is made to accommodate your schedule and ensure workloads are reasonable.

Become an examiner panel member today!
